Thu Duc, Ho Chi Minh City

Career Objective

Fullstack Developer Intern with hands-on experience in building web applications using React, Node.js and MongoDB. Familiar with developing RESTful APIs, handling authentication, and integrating frontend with backend systems. Seeking to contribute to real-world products while strengthening both frontend and backend development skills.

Projects

Healthcare Clinic Management System

03/2026 – Present

Fullstack Developer / Business Analyst

Tech Stack: React, TypeScript, Node.js, Express.js, MongoDB, TailwindCSS

- Built responsive admin dashboards for managing patient records and appointments using React and TailwindCSS.
- Developed RESTful APIs using Node.js and Express.js for handling patient and appointment data.
- Designed MongoDB data models and performed CRUD operations for storing and retrieving application data.
- Managed UI state and handled API data using React Hooks with Axios integration.
- Implemented role-based access control (RBAC) with JWT authentication for secure access.
- Applied TypeScript to improve code reliability and reduce runtime errors.
