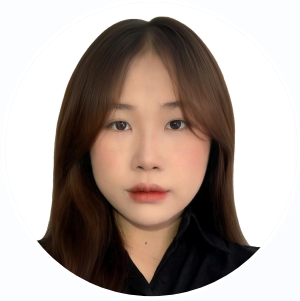
Thu Duc, Ho Chi Minh City



Career Objective

Frontend developer intern focused on building scalable React applications and improving user experience through clean component architecture and efficient state management.

Projects

Healthcare Clinic Management System

03/2026 - Present

Business Analyst / Fullstack Developer

Tech Stack: React, TypeScript, Spring Boot, PostgreSQL, TailwindCSS

- Defined and implemented clinic workflows including patient registration, appointment scheduling, consultation, and treatment management.
- Developed admin dashboard for reception, cashier, and clinic management.
- Implemented auto-refresh dashboards (10–30s) for real-time appointments, queue, and payment updates.
- Built RESTful APIs with JWT-based role access control.
- Implemented booking slot and doctor queue logic to prevent overbooking.
