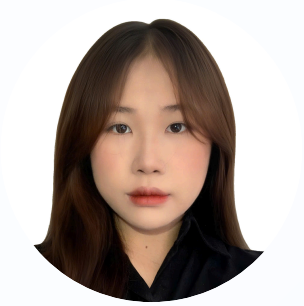
portfolio

Thu Duc, Ho Chi Minh City



Career Objective

Fullstack Developer Intern with hands-on experience in building web applications using React, Node.js and MongoDB. Capable of developing RESTful APIs, handling user authentication, and integrating frontend with backend systems. Seeking to contribute to real-world projects, strengthen system development skills, and deliver valuable products.

Projects

Healthcare Clinic Management System

03/2026 – Present

Fullstack Developer / Business Analyst

Tech Stack: React, TypeScript, Node.js, Express.js, MongoDB, TailwindCSS

- Built a responsive admin dashboard for managing patients and appointments using React and TailwindCSS.
- Developed RESTful APIs using Node.js and Express.js to process patient and appointment data.
- Designed and worked with MongoDB (CRUD operations) to store and retrieve system data.
- Managed UI state and handled API data using React Hooks with Axios.
- Implemented role-based access control (RBAC) and user authentication using JWT.
- Applied TypeScript to improve code stability and reduce errors during development.

Spa Management System

01/2026 – 03/2026

Fullstack Developer

Tech Stack: React, Node.js, Express.js, MongoDB, Ant Design, JWT

- Developed an interactive booking system using React Big Calendar with drag-and-drop functionality.
- Built a responsive interface and converted designs into a complete UI using Ant Design.
- Developed RESTful APIs and integrated data between frontend and backend using Axios.
- Implemented user authentication using JWT.
- Managed data and updated the UI in real time using React Hooks.
- Implemented booking data validation using Joi to ensure data consistency.
